## Creation/Anti-Evolution Bibliography

### [Master Book List](#) [Master Books](#)

---

This is a bibliography of creationist (and a few anti- evolutionist) books, mostly from a young-earth perspective. We are beginning with a list of about **three hundred volumes**. The bulk of this list is courtesy of Ashby Camp, with about eighty additions from Eric Blievernicht's own library; children's books are not included. I also removed a few books from Ashby's list since the purpose of this list does not encompass everything in his original list.

We are *not* necessarily endorsing anything in this list, *nor* is this an endorsement since I have read most, but by no means all, of the material on this list.
