Creation Discovery Museum

<https://youtu.be/nmnFZeLkhuM>

Tom DeRosa is the founder of the Creation Discovery Museum in South Florida. Located in Deerfield Beach, near Fort Lauderdale, this museum features three major themes: Catastrophic Flood of Noah, the Ice Age and Dinosaurs. Many of the museum's primary fossils come from the vast phosphate beds near Peace River near Arcata. Surprisingly for Florida, these creature are mostly assigned to the Ice Age. The museum is associated with Creation Studies Institute, Coral Ridge Presbyterian Church and Calvary Chapel. At CSI's Museum you will:

Witness God's amazing creatures - the dinosaurs - in fossil form and learn how they coexisted with man.

Walk through the Great Ice Age and touch the bones of one of the largest Columbian Mammoths that once roamed the earth.

Discover facts that present the case for creation and the evidence against evolution.

The Nature of the Chemical Bond

<https://youtu.be/CD-fnDxWOrs>

Understanding basic chemistry leads to solutions to two important issues for creation scientists. It helps understand how leaching may occur in radioisotope sample causing dates to be skewed dramatically toward deep time. It also helps us to understand how bonding of various types leads to the processes we observe in life. Each element had a nucleus of protons and neutrons, and that nucleus is surrounded by electrons. Electrons have four types of orbitals: s, p, d and f. The s orbital is the simplest in that it is spherical. The other three types of orbitals are standing waves of orbits because the path of the orbits follow the wave function described by Erwin Schroedinger. The parent elements of every one of the elements involved in radioactive decay form ions that are much more likely to dissolve in water than those of the daughter elements. Therefore leaching is one of the more likely explanations why radioisotope dating yields deep time dates. Also, understanding ionic, covalent, hydrophobic, hydrogen and Vanderwaals bonds helps us know how the chemistry of life works.

The Broken Clocks of Deep Time

<https://youtu.be/ufO5u7ESVuM>

Evolutionists use radiometric dating methods to justify their claims of deep time. But are the results accurate? Charlie Wolcott explains the assumptions of radiometric dating and analyzes the exponential decay function which is the primary equation that is used to derive the age of the earth and the rock layers in the geologic column. The assumptions with the decay equation are:

1. Known initial amount of parent isotope
2. Known initial amount of daughter isotope
3. Constant decay rate (nothing can alter the rate of decay)
4. Closed system (can't have isotopes leaching in or out)
5. Homogeneity (uniform distribution).

There are problems with each of these assumptions. For example, the rate of decay is something that the laboratory only measures for 30 minutes of a half-life, which for Uranium 238 is 0.0000000000000127%. There is no way that this verifies that the decay rate over 4.5 billion years is constant. The initial amounts of parent and daughter elements are assumed, not measured. And differential leaching of isotopes is a real possibility. Charlie shows that radiometric dating isn't scientific, but agenda driven, and proposes several tests that can be done to show that.

Challenges in Distributing Aid in South Sudan

<p>Dan and Teresa Janzen are missionaries to the country of South Sudan. In our interview with them, they talk about the extreme conditions in the country that make it difficult to help the people, and the efforts of non-government charitable organizations to bring relief are often fraught with misconceptions and political agendas that make it difficult for the aid to reach the people who need it the most. Dan and Teresa talk about Christian-based teaching that causes people to learn how to plant crops, farm, and create income rather than moving to the cities where aid is handed out but there is no human dignity or future.</p>

The Twilight of Atheism		
<a href="https://youtu.be/5n43jBeSp1M">https://youtu.be/5n43jBeSp1M</a>		
<p>Mike Nolan explains that atheism has been out of fashion for quite some time, and though Christians have recently been addressing the arguments of pure atheism successfully, the scenario has shifted quite a bit. The current environment is a mixture of postmodernism, paganism, cults, and other forms of rebellion against God though in many forms appearing like spirituality. Mike takes us on a discovery of the history of atheism starting with the French philosophers who were seeking to divest themselves of the monarchy who held dual political and ecclesiastical power. They figured that the church was devoid of the truth, and they sought to replace it with a morality that was based upon scientific and practical reasoning. This led to the geology of Hutton and Lyell, Marxism and Darwinism. It is obvious now that the science no longer supports these systems of reasoning, but that leads to a different strategy of questioning the existence of truth, adoption of different gods, and defining spirituality in terms palatable to those who aren't very interested in following the God of the Bible. Understanding these new complications adds to the challenge of addressing today's worldviews.</p>

How I Found God in Quantum Chemistry Class		
<a href="https://youtu.be/CpnRrUjdHPo">https://youtu.be/CpnRrUjdHPo</a>		
<p>Dr. Mike Nolan describes his experiences in graduate school that started him on a search for an explanation for what he saw in all of the complex rules and equations he learned in quantum chemistry class. There, he was compelled to understand principles like Schroedinger's equation that defined the wave orbital structure of electrons about the nucleus of an atom. He deduced that the world is governed by these interrelated rules, and they must have come from some higher intelligence that would have assembled it. He decided to revisit the Bible and found that the message it delivers was quite different from the storybook tales he heard as a boy in Sunday School. The Bible describes real people with flaws, faults and sins that lead to consequences, and he found that the God of the Bible not only provides a remedy for this but also reasonable explanation for the orderly nature of the world we see around us.</p>

New Medical Breakthroughs with the MRI		
<a href="https://www.youtube.com/watch?v=5HtAymLjfg">https://www.youtube.com/watch?v=5HtAymLjfg</a>		
<p>Dr. Raymond Damadian, inventor of the MRI, explains the new technology of the Stand-Up MRI produced exclusively by his company FONAR, and the research that this enables. He believes that he has discovered the cause of the family of brain diseases that include Parkinson's, Alzheimer's, Autism, Multiple Sclerosis, and ALS (Lou Gehrig's disease). With the Stand-Up MRI, it is possible to scan a person in any position and not only take high-resolution scans, but actually take MRI movies as fluid flows in the body. His research, conducted with chiropractor Dr. Scott Rosa, identifies the formation of lesions in the brain caused by the backup of cerebral spinal fluid. Misalignment of the top two vertebra in the spine restricts the flow of this fluid. Like the circulatory system and lymphatic system, 32 quarts of this liquid flows from the brain to the bottom of the spinal cord and back every day. Injuries to this part of the spinal column causing misalignment can be corrected by a specialized chiropractic adjustment. It is possible to measure the amount of restricted flow, identify the misalignment, and detect the progress of healing through MRI scans. Multiple directed MRI scans are now being used to monitor the progress of cancer treatment and discover if the treatment being used is effective. This technology is attractive to investors. FONAR holds all of the patents.</p>

Why the Inventor of the MRI Believes in the Creator of the Bible

<https://youtu.be/MDncSrXLUUpA>

Dr. Raymond Damadian, inventor of the MRI, explains where his faith in the God of the Bible comes from. He credits Billy Graham for causing him to make his decision of faith, but it was his scientific mind that caused him to firmly decide that the origin of life by evolution does not make sense. He finds that it is incredible that people believe that intelligence found even in slime molds is what is ultimately responsible for the intelligence found in human beings. What transpired to cause the 400 cc brain size of a chimp to increase to the average size of the human brain at 1260 cc? He also explains that the current technology of the FONAR MRI built by his company is superior to most MRI scanners currently used in hospitals. The Stand-Up MRI as it is called, uses a new magnet technology that does not require it to be supercooled. Therefore it is less bulky and can scan a person in any position. It also take MRI movies of tissue and flow of fluid. It is being used to diagnose brain disease as well as cancer. This new technology is not available in Michigan yet, but it is an amazing opportunity for investors who want to make a difference in health care.

Steve Sharp talks about the success of the reintroduction of the wild turkey in Michigan in 1954 and how the habitat has changed after the lumbering days. It went from pine forest that was lumbered to grasslands that were good for quail and pheasant, scrub brush that was good for woodcock and as the forest matured, it provided habitat for wild turkey. He demonstrates the difference between spring and fall turkey hunting and which calls are appropriate for either season. He also describes a little bit about the different species of turkey and some of the unique anatomical features.

A Solution For Seeing Stars

<https://youtu.be/C56zIwSxPY>

David Harris was one of the very first creationists who proposed a model why we are able to see stars that were millions of light-years away. In 1978, he published his model in the Creation Research Society Quarterly, and several other creationists got on the bandwagon and started to propose their own models. David's model had light from distant stars traveling at an infinite light speed, but at the time of the fall of man, it created an impedance that slowed down the speed of light as it approached the earth. Earlier, creationists such as Henry M. Morris proposed a model of light created in transit. When we interviewed Dr. D. Russell Humphreys, he said that the model David Harris proposed inspired him to develop his own white-hole cosmology, which solves the issue using the general theory of relativity to propose that time runs at different rates in the universe. Other scientists such as Jason Lisle and Steve Miller propose variations of David's idea. Steve Miller believes that we are seeing the universe in near-real time. Jason Lisle proposes a variation of that concept. His model is called the Anisotropic Synchrony Convention.

God: The Master Artist

[https://youtu.be/a\\_-YHLev4jM](https://youtu.be/a_-YHLev4jM)

You can view the beauty of God's Creation, or you can see the scum. It's all a matter of perspective. Art is imitating God's creation in all of its glory. There are elements of color, proportion, symmetry, perspective, emotion, connection, complexity and personality all tied up in art. What makes up good art? Artists don't agree and usually cannot come up with anything, yet you know it when you see it. Is it all a matter of personal experience or preference? Classical art often reflected what you knew was truth, beauty and happiness, and it was usually done in the name of Jesus. Now, secular art isn't like that, and since the classical time there has been a rebellion against the church and representational art. I call it art entropy: the devolution of art. Without meaning, art becomes an emotional expression, often that of chaos, confusion and nihilism. But Christian art counters that, and should reflect the fruits of the Spirit: love, joy, peace, longsuffering, gentleness, goodness, faith, meekness and temperance.

Why Believe in Evolution Against All Odds?

<https://youtu.be/Jxf-uwlrOvl>

Many examples exist that show that the chances of evolution producing life are so remote that it defies all of logic. Yet people believe in evolution, and they do so in many cases with evangelistic fervor. Why is this the case? If you dump a jigsaw puzzle onto the floor, what are the chances of it coming together completely assembled? Why does your finger grow to a certain optimum length and then just stop, perfectly proportioned to do its job? How did the dolphin's nose move to the back of his head? Evolution is attractive, though, because it provides a perfect excuse for poor behavior. A lot of people are angry with God, and blame him for the consequences that occur when they disobey His laws and rebel against Him. They really don't want Him in their life, so evolution is a convenient reason for their rejection of Him.

Dark Matter: MOND, MACHOS or WIMPS?

<https://youtu.be/Hd8oNFIqpXs>

Derek Marshall discusses the case for Dark Matter in the universe as he reviews Dr. Danny Faulkner's article in the Answers Research Journal. Within the biblical creation movement, there is much resistance to the possibility of dark matter. One reason is that the motions of galaxies within clusters have been used as evidence of recent origin. But Danny makes the case for the existence of dark matter and discusses three different theories for how it operates: MOND, MACHOS and WIMPS. MOND is Modified Newtonian Dynamics, suggesting that our understanding of classical Newtonian gravity is incomplete. MACHOS are Massive Compact Halo Objects, such as black holes, white dwarfs, brown dwarfs and planets. WIMPS stands for Weakly Interacting Massive Particles. All are dependent upon interpretations of Einstein's General Theory of Relativity, and the data doesn't quite fit any of these explanations, so we are left with additional mysteries to solve.

Is the Intestine an Example of Poor Design?

<https://youtu.be/U3pxYgPI6TU>

Jerry Bergman is the author of over 60 books, and two of his new outstanding volumes are called Poor Design and Useless Organs. These books are the result of over 50 years of research into these outmoded arguments by evolutionists, and each of the examples that have been brought out have been answered, showing the purpose of the design of each structure in the human body. The fact that some show overdesign and redundancy is not an argument against design. They argue that the intestines are vestiges of when we walked on all fours and that some of the troubles we have are the result of random design. That is far from being the case.

Fuite de l'Absolu

<https://youtu.be/U34jjL4loQ>

L'Occident est à l'heure des confrontations. Confrontations extérieures comme celle avec l'islam, qui fait entendre sa voix sur la scène internationale, et confrontations intérieures, où des concepts sociaux et moraux millénaires sont contestés, marginalisés ou redéfinis. Au milieu de cette crise, l'Occident tente de redéfinir son identité.

L'anthropologue sur le terrain, est guidé par le principe que chaque

culture s'enracine dans une vision du monde qui forme et influence non seulement ses rites et ses mythes mais aussi son système éthique, ses moyens d'expression culturels, sa science, son système politique et juridique. Si un système idéologico-religieux constitue alors l'infrastructure de toute civilisation, il est utile de poser la question : qu'est-ce qui constitue la religion de l'Occident au XXI<sup>e</sup> siècle? Quelles sont ses institutions, ses rites, ses mythes d'origine, ses apôtres, ses fidèles, ses

initiations ? Si, autrefois, la morale était établie par des autorités religieuses traditionnelles, qui remplace ces acteurs dans le contexte postmoderne? Quelle sera leur influence sur les questions de l'heure en santé en biotechnologies, dans le rapport de l'homme avec l'équilibre planétaire, l'environnement et la faune, ou par rapport à la place de l'intelligence artificielle ? Fuite de l'Absolu tente donc d'examiner ces questions, plus ou moins licites, pour regarder au coeur de notre génération. Qu'y trouverons-nous?

Fuite de l'Absolu est un livre destiné aussi bien à un public avisé qu'au grand public qui cherche à comprendre quelle est la source des valeurs véhiculées par notre société. Cet ouvrage est une analyse qui décape les discours dominants de l'heure, exposant leurs fondements.

Writing both in French and English, Paul Gosselin is an independent researcher specializing in ideologies, belief systems and religions. He holds a Masters in Social Anthropology and is the author of the French book, Hors du ghetto (on culture and the arts). His Flight From the Absolute series involved years of investigation into Western ideologies and belief systems, in particular, postmodernism. Gosselin has been known to make his own pizza and boeuf braisé from time to time... He has lived in Nova Scotia, California, Vancouver Island, Hull QC and currently resides in Quebec City. Paul discusses on Revolution Against Evolution the puzzle of postmodernism as the predominant philosophy in our culture. It has no rational basis, as it is a rejection of the Enlightenment concept of science as Truth as well as the Christianity as a basis for morality. It is a self-centered religion where truth is relative to a person's whims and emotions.

The Importance of the Creation Message in India

<https://youtu.be/D0KqixsAiE0>

This is an interview with Kancherla Sirish, a school teacher in India who describes the importance of the Biblical message of creation to Christianity in India. Christians form a very small minority in India, and face some unique challenges in their culture in presenting the gospel of Jesus Christ. The majority of people in India are Hindu, and another minority religion is Islam. Hindus serve many different gods, and to them Jesus Christ is just one other god to add to the pantheon of gods they serve. In addition, they believe that theirs is the oldest religion going back many eons in time, and to them the evolutionary worldview is compatible with their Hindu religion. Sirish is instead teaching the Biblical model of creation and found support and comfort in the Revolution Against Evolution book that was sent to him in 2004.

Grand Canyon Geology

<https://youtu.be/An2VAJnMmm4>

We have made quite a number of trips to the Grand Canyon since the first one in 1999, but there are always new things to learn. There are two competing creationist models for the formation of the Grand Canyon, but they are quite similar. Dr. Stephen Austin proposed a breached dam that came from post flood lakes behind the canyon in the Navajo land. Michael Oard believes that sheet runoff after the flood caused a channel to be carved through the mountain. At the great unconformity near the bottom of the canyon, the bottom layers are tilted, then planed off smooth, and new layers deposited on top. The Devonian Temple Butte formation appears in some places, but in one place on the North Kaibab Trail, it is missing and the layers above and below are interbedded. In Sedona, the layers that appear at the Grand Canyon are 1,000 feet lower and the Schnebly Hill formation that forms the red rocks there is missing at the Grand Canyon. All of these anomalies are better explained in a catastrophic world-wide flood model.

If you want an easy-to-read general purpose creationist book you can give to high school students that is up to date and explains the highlights of God's creation, get this book Revolution Against Evolution. In 1986, the first edition of Revolution Against Evolution was published and 2,500 copies were distributed, though it was initially designed for a Bible Training Institute class. It was reprinted in 1993 and in 2013 it was updated and made into an e-book. Now, we have re-edited this book and brought it up to date with the current creationist research. Most of the arguments presented in the original book remain effective, and speculations originally made have been confirmed with more thorough research and visits to the sites mentioned in the original. The new version will sell for \$9.95 plus \$3.00 shipping and the chapter titles are:

Amazing Design in Plants

<https://youtu.be/zR6NQT-UR14>

Dr. Grady McMurtry shares his story of inquiry into truth as a scientist that led him from a belief in evolution as a teacher to discover the truth of Christianity. He then questioned evolution and found it a house of cards. Dr. Grady talks about unique design in plants and how they are interdependent upon insects for pollination. We talked about the dinosaur tree, the Wollemi Pine, that was abundant during the time of the dinosaurs, yet was found in Australia and grows in various places today. Design involves mathematics and Derek Marshall explains how plants exhibit the creation function spiral, the fibonacci series, and the golden ratio. God's design is exhibited in full and partial metamorphosis where a caterpillar turns to jelly in a chrysalis and emerges as a moth or butterfly. A challenge to evolution is for a synthetic chemist to produce a pill that you plant in the ground, absorbs nutrients and grows to be a plant where it produces seeds like it.

How Evolution Destroys the Church

The mission of the Revolution Against Evolution is to remove the stumbling blocks that hinders faith in Jesus Christ and the church. In this show, we investigate the origins of the theory of evolution beginning with Charles Lyell and Charles Darwin, and how the simple layout of a theory that is contrary to the Biblical record hoodwinked the church into believing that in order to be scientific, theologians needed to abandon the Biblical story of the beginning. But, as Luther Townsend pointed out more than 100 years ago, "The Bible doesn't have to apologize if it is not in harmony with error."

Assignment: Create Artificial Life

<https://youtu.be/5ewxHkTKPbc>

If you were given an assignment as an engineer to create a living cell or any kind of organism or machine that emulates life, what would you need to do? Doug explains the chemistry that is behind life and looks at the barriers that scientists would need to ascend in order for its synthesis. The chemistry of proteins is just one of many complex processes that are beyond explanation. Amino acids, when they are synthesized, are produced in equal amounts of left-handed and right-handed isomers, but life only uses the left-handed variety. Since a protein averages over 400 amino acids in length, the odds of a protein being formed by chance is one in 10 with 123 zeros after it. This is like a snail moving the entire earth one molecule at a time one millimeter in a million years to the other side of the known universe and back, in a race with a protein factory producing random proteins at a rate of 400 tons a second. By the time a usable protein is produced, the entire known universe would be filled with proteins from the protein factory, and only one would be usable in life. This is only the beginning of problems for origin of life scenarios.

What Must I Do to be Saved?

<https://youtu.be/Qaue2DqfY4E>

The question "What Must I Do to be Saved?" is the question of the ages. Each of us needs to ask ourselves if we are prepared for what lies ahead after we die. The atheist claims that death is the end and that is what we need to settle for. But for the Christian, there is a hope that we have that there is a life beyond death. Either Jesus is who He says he is, or he isn't, and either we accept Him or reject Him. Three out of four of these possibilities are losers. If Jesus is who He says He is and we accept Him, we have eternal hope of life in heaven.

Time is Short - A Tribute to Dave Page

<https://youtu.be/tMSHg-pznB4>

Evidence is that time is short, not only for those of us who have reached retirement age, but for all of us. A faithful member of the Revolution Against Evolution TV crew, Dave Page, passed into eternity recently, and this gives us all cause to consider our own mortality and where we are going. With the corona virus pandemic bringing chaos to the world, this brings us back to the basics and we need to consider how God made us, and what His purpose is for us on the earth. That is to resolve just one question. Do we still want to pursue our own way, or do we want to accept Him as Lord and follow His ways? Do we want to believe His word in Psalm 91 where He offers protection from pestilence and plague? There are two possibilities why sickness and disease exist. One is that viruses and bacteria were originally created for major functions in life, but some of them have been corrupted by mutations. The other is that at times God allows plague in order to call our attention to areas we need to correct. Our body is made up of a four-dimensional computer code that manufactures all of the components needed for living and we cannot explain its existence without appealing to a supernatural intelligence that created it. We also need to be aware of the danger of the enemy of our soul who is able to manipulate God's creation to create disease.

Gentleness

<https://youtu.be/MLxeGsCKp3c>

Gentleness is one of the fruits of the Holy Spirit, and without the Holy Spirit, these characteristics are contrary to human nature. Atheistic and pagan cultures do not exhibit gentleness. Philosophies such as fascism and communism that embrace Darwinism are devoid of gentleness. Gentleness = love + joy + peace + meekness. It is not talked about a lot even in Christian sermons and teachings. In II Samuel 22:36 and Psalm 18:35, David credits gentleness in making him great. In these discourses, he attributes all of the advantages that the Lord had given him in becoming king. Gentleness means that you are totally transparent and vulnerable. You are meek, with nothing to lose. It is a position of strength, abundance and unlimited supply where you can afford to administer mercy, grace and compassion for other people. In II Corinthians 10:1, gentleness brings boldness. A gentle person speaks evil of no man, no brawlers, and showing meekness and humility toward all men. A gentle person shows wisdom, being peacable, gentle, easy to be entreated, full of mercy and good fruits, without partiality or hypocrisy. The fruits of the Spirit are love, joy, peace, longsuffering, gentleness, goodness, faith, meekness and temperance. Against such there is no law.

Peace

<https://youtu.be/rtepbj59tM>

Peace is a tremendous advantage in being a Christian. It is knowing that the Bible is internally consistent. Peace is an eternal perspective, knowing that God is in control, that we are a child of the King and our ultimate destination is heaven. Think of moments that encourage peace, like your times on a still lake with the mist rising up, a walk in the woods and listening to the birds singing their songs. Pursue them more frequently. Evolution cannot explain peace. It is opposite of the survival of the fittest. Altruism, giving, speaking encouraging words and blessing other people all bring peace and depend upon God as our supply, enough where we can share with others. Peace is allowing the Lord to fight for you, holding your peace in the midst of strife. Jesus became our peace offering. If someone smashes your car and you decide to forgive them, who pays for the repair? You do. That's what Jesus did. He took the penalty for the damage you have done with sin. Who brings peace? The Holy Spirit. Enemies of peace: confusion, anger, bitterness, accusation, envy, jealousy, unforgiveness, replay, selfishness, fear, guilt, shame, lying and hatred. If you want peace, purge yourself of these. If you find that difficult, ask God for help.

God's Creation is Pure Joy!

<https://youtu.be/HCeJCsSy9zI>

You could call it unscientific, but encounters with God often occur when we enter into a place of pure beauty and solitude with nothing but silent still waters and the wildlife surrounding us. Such times yield moments of pure joy, and as we allow God to speak to us through His creation, we become renewed. We reflect on our past experiences where we seize the moments when we encounter beautiful views, serene moments and inspirational observations. For Doug it was a garden of Eden experience in Kauai and northern Michigan, for Rich, his Grand Canyon experience and Glacier National Park.

Masoretic Text versus Septuagint

<https://youtu.be/xvhWOHb62L0>

Those who believe in the Biblical chronology in the Old Testament piece can together a timeline from the beginning in Genesis to the birth of Christ, and depending upon the original manuscripts used, different results are reached. The challenge is to determine which text may have been corrupted or changed, and the reasons why. Most Protestants rely on the Masoretic text as the authority, but some argue that the Septuagint dates solve some problems, especially with reconciling with secular Egyptian chronology. These issues are discussed in this program.

Supernatural - But Not God		
<a href="https://youtu.be/KjWZws_1VG0">https://youtu.be/KjWZws_1VG0</a>		
<p>Doug and Rich recount events in their lives where accounts of the supernatural impacted their lives negatively, causing fear and doubt. But when they encountered Christ in their lives and received explanations for the supernatural, that fear dissipated with the realization that God is powerful enough to defeat these supernatural forces. Fascination with the occult pervades our society and it starts innocently even with children's stories, but in many cases overcomes a person to where their life is significantly disrupted. Evolution's role in this is explained.</p>

Thermodynamics and Genetic Entropy		
<a href="https://youtu.be/FVNfthG6Gy0">https://youtu.be/FVNfthG6Gy0</a>		
<p>The second law of thermodynamics prevents the creation of perpetual motion machines and it is also a major complication for the theory of evolution. Dr. John Sanford points out that there is an additional layer on top of that he calls "genetic entropy" where the loss of information due to harmful mutations leads to a limit on the time life can continue to exist. At the rate of 300 deleterious mutations per generation it caused Dr. Kondrashov to ask the question, "Why aren't we dead 100 times over?" Unless an energy conversion mechanism exists, the sun's energy speeds up entropy and cannot become a driving force for evolution.</p>

Transition Trouble: Cold-Blooded to Warm-Blooded		
<a href="https://youtu.be/PWfOpKJi2mw">https://youtu.be/PWfOpKJi2mw</a>		
<p>Many features of life either exist or they don't. A cold-blooded creature like a frog is far different from a warm-blooded animal like a giraffe. Some time in a supposed evolutionary development a cold-blooded reptile switched over to being warm-blooded. Other examples: non-life to life, gills to lungs, non-flying to flying, mammals to whales, and special valves in the neck of the giraffe.</p>

Did God Use 200-bit Encryption When Creating Life?		
<a href="https://youtu.be/EfAO_DDSJZg">https://youtu.be/EfAO_DDSJZg</a>		
<p>Derek Marshall explains that there is evidence of design in that the biological molecules of earth are formed from 5-6 elements from the 3rd period of the periodic table creating a digital combination lock, a form of encryption. The chemical space created by this encryption is a possible 10 to the 60th power of possible organic compounds under 500 Daltons. Derek's model shows that generation of the larger amino acids of the 20 that are used by life are not probable under origin of life experiments.</p>

The Great Freeze After the Flood		
<a href="https://youtu.be/SN0YewxFkv0">https://youtu.be/SN0YewxFkv0</a>		
<p>The Ice Age is postulated to have occurred shortly after Noah's flood, caused by weather patterns set up from warm oceans after the flood piling up snow in the interiors of the continents but causing temperate climates at the edges of the continents. Climate changes occurring while the earth was drying out accounts for features of geomorphology like drumlins, kames, eskers, moraines to be left behind by glaciation.</p>

The Cambrian Explosion

<https://youtu.be/-upBSdc8cAg>

About 75% of the geologic column (according to evolution) is Precambrian, the layers of rock devoid of fossils. Then, at the Cambrian, fully formed creatures appear in the fossil record. This baffles evolutionists and the problem of explaining the layers of rock, many of which are not in the order in which evolutionists expect, has the burden of proof placed in those who believe in deep time.

<https://youtu.be/zi1Tkqanw6M>

Neuropathy is a disease of the nerves causing numbness, pain and various symptoms in the extremities. Usually, once a person is diagnosed with neuropathy, doctors will tell their patients that there is no real cure, and the only treatment they offer is to manage their symptoms and pain. Dr. Jean-Guy Daigneault disagrees, and has found that by managing lifestyle choices and choosing wellness that the effects of neuropathy can be reversed.

Operation

<https://youtu.be/9qRGF82PG10>

A funny song aired on the radio expressed how much the singer's life would be better after he's had his operation. Often people think God has made a mistake and the cure is surgery to "improve" the human body. We know that surgeries are needed to help get our body rid of a disease, but it isn't possible to add new features or correct what some perceive as design flaws in the body. We can also ask that question about other living systems. Can we put wings on a dolphin? Can we redesign a pomegranate? Should we cut off our fingernails because they are part of our evolutionary past?

The Circulatory System is one of about a dozen different systems in the body that cannot work independently of the others. The respiratory system, nervous system, muscular system, lymphatic system and others all interconnect intricately with the circulatory system and if one part fails, the others cannot function. At birth, God designed the baby's circulatory system to disconnect from the placenta and instantly kick start into new life. This is evidence for design.

Big Lies Shouldn't be that Hard to Detect		
<a href="https://youtu.be/LDe4Kf1BKBY">https://youtu.be/LDe4Kf1BKBY</a>		
<p>Sometimes, the bigger the lie, the easier it is to miss. That was the case with the Piltdown Man, where a human skull cap was matched with an ape's jaw and planted for someone to find. That fooled experts for 40 years. The Miller-Urey experiment was the big headline that suggested that life could be created in the test tube. But the experiment was a failure. These lies can be perpetuated by having a headline that says one thing but the details of a study show exactly the opposite.</p>

This created a mass hysteria where people were tortured to confess to witchcraft and told to name others who were involved. How Do You Measure and Define Beauty?		
<a href="https://youtu.be/yZF9S0TZvBI">https://youtu.be/yZF9S0TZvBI</a>		
Beauty is a spiritual quality, and it is something that is difficult to measure and define scientifically. Some of the limitations of science are in the areas where the spiritual is dominant such as in the fruits of the Holy Spirit: love, joy, peace, longsuffering, gentleness, goodness, faith, meekness and temperance. Beauty is often measured using the Golden Ratio where the proportion of sizes seem to fit a pattern. Symmetry, perspective, color also appeal to the eye, but most often when the surroundings mimic the natural world, there is beauty.

Is the Appendix Useless?

<https://youtu.be/inpGpx9tmbw>

One of the central claims of evolution is that as life went through its progression of development, some of the organs and features began to lose their original function and became vestiges of their original purpose. The appendix is one of these that in the past was considered to be such, but now the functions are known. Jerry Bergman's book "Useless Organs: The Rise and Fall of a Central Claim of Evolution" shows that this argument has fallen by the wayside with the discovery of the functions of all organs that were once considered vestigial.

The left recurrent laryngeal nerve proceeds from the brain down the spine, goes around the aorta and then is routed back up to the larynx. But I issue a challenge to Dawkins to surgically reroute this nerve, shorten it and as a result improve a person's speech and voice.

The Human Eye: A Poor Design?

<https://youtu.be/UAYP5p4J260>

The claim made by evolutionists that the eye is poorly designed is irresponsible, and reflects a lack of understanding of basic biology. Their argument is that the retina is backwards of what is expected with the photoreceptors pointing away from the source of light. But if you examine closely what actually goes on in the eye, the photoreceptors are in a spot where cells are replaced rapidly, and need to be near the blood vessels where nutrients are supplied and waste cells are carried away. If they were in the place evolutionists say they should be, light would be blocked by the red blood cells. These claims are a deception and need to be exposed.

Michigan's Geology from a Creationist Perspective		
<a href="https://youtu.be/ms5IM9SwQl4">https://youtu.be/ms5IM9SwQl4</a>		
Michigan's Geology tells a story of how sediment was laid down during the flood of Noah in a circular pattern in a basin. It was sheared off with flood runoff and then glaciated. The idea of uniformitarianism was used by Charles Lyell to estimate the age of the Niagara Falls by extrapolating the rate of erosion found in the present to come up with a time scale. This time scale is disproven by historical records, yet it is used as a foundation for evolutionary age estimates.

The fibonacci series is 1,1,2,3,5,8,13,21,34,55,89,144, 233, (377) and each number adds to the previous to get the next number. This pattern is found throughout life and in the orders given by God to build the ark and the temple. In 1970, a little tract was published by Inter-Varsity Press called the Western Book of the Dead. It was a parody of postmodern culture brought about by the assumptions of evolution where nothing became something, life came from chemicals and that man resulted. It also assumed that the rumor of God and His son was an invention of man. The results are that love becomes meaningless and culture dies. Man ceases to be man, and instead becomes the most terrifying animal on the face of the earth.

Planetary Magnetic Fields		
<a href="https://www.rae.org/product/ncsu/">https://www.rae.org/product/ncsu/</a>		
Dr. D. Russell Humphreys predicted the strength of the magnetic fields of Uranus and Neptune based upon his theory that God created the earth and planets of the solar system from water where all of the hydrogen atoms were lined up, and then decayed in strength from there. His predictions were right on, whereas the dynamo theorists fail in their predictions.

Down, Not Up: The Problem of Genetic Entropy		
<a href="https://youtu.be/ihsdS-OPx_8">https://youtu.be/ihsdS-OPx_8</a>		
Dr. John Sanford is the inventor of the Gene Gun. The gene gun method is a method used for genetically modifying plants. With the use of a gene gun, the gene gun method delivers extra DNA directly into a plant's nucleus. The method is also commonly called particle acceleration or microprojectile bombardment. Dr. Sanford has determined that the genetic code is deteriorating at a rate of 300 mutations per generation. He describes that this is opposite of the expectation of evolution and that natural selection cannot correct this problem. But the answer is found in the gospel of Jesus Christ.

Darwin Revisited		
<a href="https://youtu.be/SkJg3vi5Nqk">https://youtu.be/SkJg3vi5Nqk</a>		
Peter Borger is the author of Darwin Revisited, and his research caused him to realize that the concept of natural selection is an illusion. He discusses how experiments with mice where they knock out genes to see what they do show that tremendous redundancy exists in the genome. The phenotype still works though the gene has been removed. He rejects Darwinian evolution and believes that the evidence points to all of the genetic code being created in the beginning.

How Long Did it Take to Build Noah's Ark?		
<a href="https://youtu.be/8pOOfA8gACU">https://youtu.be/8pOOfA8gACU</a>		
Sue Langham gives an account of her visit to the Ark Encounter. From his research, Derek Marshall estimates that the building of the Ark would have been over a very short period of 46 days based upon how fast a wood frame structure could be built with a lot of faith, help and miracles. He cites clues from scripture to support his idea. Tradition has it that it took 120 years. ICR estimates 60 years, Answers in Genesis 55-75 years, yet they built their replica in 2 years. Derek suggests that Noah would have been in a real hurry to build it with God's help.

Northern Michigan provides an excellent picture of the type of landforms that were caused by a period of glaciation that occurred a short time after Noah's flood. Creation scientists have modeled the weather pattern that would have produced the glaciers. Mammoths and mastodons were warm-weather creatures that lived in the areas near the warm oceans, but a weather pattern produced the climate that piled tons of snow on the interior lands, producing the glaciers. That is why quick-frozen mammoths were found in Siberia and northern Canada.

When is Science not Scientific?		
<a href="https://youtu.be/rqChXQY_NQk">https://youtu.be/rqChXQY_NQk</a>		
Science suffers from a definition problem, and many times people cannot tell the difference between empirical science and forensic science. Empirical science is where you set up the conditions in the present where you can control all of the starting assumptions. But with forensic science, everything happened in the past and you are left with clues as to what happened, but you cannot control those starting parameters. That is where evolution has a problem.

Does Eating Fat Make You Fat?		
<a href="https://youtu.be/nilK9ofkVZ4">https://youtu.be/nilK9ofkVZ4</a>		
Since the 1980's, the national health standards have promoted what is called the food pyramid, which tells us that sugars and fats should be eaten sparingly, if at all. Dr. Jean-Guy Daigneault is a chiropractor who is also a nutrition expert, and though he agrees with sugar being bad for you, recent studies have shown that avoidance of fat is a problem. Consumption of good fats is essential for the production of hormones and it helps to lose weight. The culprit is trans-fatty acids found in mass-produced foods.

This research looked at select portions of DNA from 100,000 different species, and researchers found a telltale sign showing that almost all the animals emerged about the same time as humans. Not only that, the study also found (rather unexpectedly for evolutionists) species have very clear genetic boundaries, and nothing much in between.

Derek Marshall solves these issues and observes that the dimensions of each of the parts of the molten sea reflect God's design in the periodic table of elements.

Evolution's Blunders, Frauds and Forgeries		
<a href="https://youtu.be/OnhgUctwKdl">https://youtu.be/OnhgUctwKdl</a>		
<p>The latest book by Dr. Jerry Bergman, Evolution's Blunders, Frauds and Forgeries may be the most important book he has written to date. Dr. Bergman is the author of over 40 books on the creation-evolution issue, and with this book he exposes not only a history of problems with people faking evidence, but perhaps a more fundamental flaw in science where ideology drives the evidence, and not the other way around.</p> <p>The first chapter deals with the problem I recognized years ago when I was first studying science, that evolution is going in reverse of expectations. Rather than showing an increase in complexity caused by mutations, it actually produces the reverse effect by producing harmful or an accumulation of near neutral mutations that eventually causes harm. It is extremely difficult to cite a case where a new feature or functionality is produced by a mutation without providing a corresponding or offsetting negative effect. At the Altenberg 16 Conference, the presenters admitted that "the theory of evolution which is taught in the classrooms today is inadequate for explaining our existence."</p> <p>Science, especially in the speculative field of evolution and paleontology, is fraught with the problem of fraud and forgery. Examples are, Bathybius Hackelii and Eozoon, eoliths, forgeries by Charles Dawson and Viswat Git Gupta, and the human facial angle blunder.</p> <p>On almost every page of Jerry's latest book, I learned something new, including an entire chapter on Francis Galton's attempt to use fingerprinting as a proof for evolution, but he never got the results he expected.</p> <p>Then many of the more famous blunders are discussed, the Ancon sheep blunder, Haeckel's biogenetic law (ontogeny recapitulates phylogeny), the sexual selection myth of the peacock, Piltdown Man, Nebraska Man, ape-to-human progression, the attempt to interbreed apes and humans, an excellent history of Java Man, atavisms and the Chinese bird-dinosaur forgeries.</p> <p>He ends his book with a discussion of why fraud exists in science today. Science is much more interested in promoting an agenda rather than finding truth, and if a student wants to survive in school and remain in academia, he needs to produce results that support the prevailing paradigm and not challenge it. So if years of research on a project brings evidence that contradicts evolution, often the results are misreported, fudged or ignored in order to get the desired grade, get a grant or a prestigious teaching position.</p> <p>This book should be required reading for students who are preparing to enter college, and for those who really question if what they are being taught actually stand up to factual evidence.</p>

Biblical Responsibility and Extreme Environmentalism		
<a href="https://youtu.be/LfdGwbtW5xg">https://youtu.be/LfdGwbtW5xg</a>		
<p>On of the first commands given to Adam and Eve in the Garden of Eden was the responsibility to take dominion of the resources that God placed in the garden. That is why Christians should take seriously the responsibility to care for the environment. That is in contrast to what extreme environmentalists propose, and many of the things they fight for are irresponsible and cause much more harm than good.</p>

<a href="https://youtu.be/dsrQtHjZp10">https://youtu.be/dsrQtHjZp10</a>		
Jeff Conklin talks about the negative effect of evolution on the basic doctrines of Christianity. Was there a literal Adam and Eve? If they were simply myths or legend, and if the first eleven chapters of Genesis are questionable, how can we explain the goodness of God, the origin of sin and death and the need for Jesus Christ the savior? Jesus himself believed in the historical fact of the fall of Adam, and that is why he came to redeem us. Evolution erodes the foundation of the Christian faith.

Does Water Flow Uphill?		
<a href="https://youtu.be/tvd6smWoUsM">https://youtu.be/tvd6smWoUsM</a>		
<p>Many ideas have been proposed for the formation of the Grand Canyon, but the physical impossibility of water flowing uphill causes us to question the idea that the Colorado River cut the canyon over millions of years. If you leave the Grand Canyon South Rim toward Cameron, you descend in elevation thousands of feet. A catastrophic flood is a better explanation.</p>

Existentialism		
<a href="https://youtu.be/SOgOtPr8zmo">https://youtu.be/SOgOtPr8zmo</a>		
<p>Existentialism is a philosophy that originated in the early nineteenth century with the Danish philosopher Soren Kierkegaard. This philosophy defined truth that is relative to the individual and places an emphasis on free choice. Other existentialists have taken this to its ultimate conclusion and framed it within an atheistic worldview. Various versions of existentialism are discussed and the negative fruits that are born as a result.</p>

The gaps are non-life to life, amino acids to proteins, nucleotides and sugars to DNA, the origin of RNA, cellular components, then from single celled organisms to multiple cells. The problems continue all the way up in the evolutionary sequence to people.</p>

Defining Morality in an Age of Confusion		
<a href="http://www.godtube.com/watch/?v=1FFBMMNU">http://www.godtube.com/watch/?v=1FFBMMNU</a>		
<p>In his book "How Darwinism Corrodes Morality" Dr. Jerry Bergman identifies Darwin disciples who screwed up the world with their writings to the point where in contemporary society, it is difficult for people even to know what a moral perspective is. That is why a biblical foundation for morality is so important, and also why a relationship with God is essential to help us when we don't know what is right and what is wrong.</p>

There are several biographies of people whose writings screwed up the world with their immoral philosophies, and how each of them were dependent upon Darwin's teachings.</p>

<a href="https://youtu.be/wq0EwpOqUX0">https://youtu.be/wq0EwpOqUX0</a>		
<p>The FONAR upright MRI with the capability of scanning in any position and producing MRI movies has revealed a syndrome caused by misalignment of the cervical vertebrae where cerebrospinal fluid backs up in the brain and forms lesions. This is the condition of Carol Geer, sister of Doug Sharp and wife of Rich Geer. The diagnosis is hydrocephalus, which is water on the brain and is causing her to be paralyzed. The hope is that correction of this condition using a chiropractic technique may restore Carol's health.</p>

For that time, she had been diagnosed with anoxic brain damage. When we interviewed Dr. Damadian last August, he told us about the brain research he's doing and invited us to bring Carol to him. He scanned her with his upright MRI and found hydrocephalus caused by blockage of the cerebral spinal fluid at the cervical area. He believes there is hope for her recovery.</p>

The Goodness of God Refutes Atheism		
<a href="http://www.godtube.com/watch/?v=1FBM1FNU">http://www.godtube.com/watch/?v=1FBM1FNU</a>		
<p>People often become atheists because they become disillusioned with God when they see so much evil in the world. But that is because of their focus. Much of what is good in this world is taken for granted. When our perspective looks for what is good in this world rather than concentrating on what's wrong, God shows Himself.</p>

<p>A sincere effort to explain the chemistry of fire from the 17th to the 19th century was the theory of Phlogiston. As new scientific facts were finally revealed by Antoine Lavoisier, the theory was disproven, but it still hung around doggedly in various forms for decades because scientists were taught differently. We can compare this with the way the theory of evolution still remains despite the evidence against it.</p>

Is the Canopy Theory Still Viable?		
<a href="http://www.godtube.com/watch/?v=Y7ZDKGNX">http://www.godtube.com/watch/?v=Y7ZDKGNX</a>		
<p>Most of the early creationist books and literature explained the origin of the waters for Noah's flood to have come from a water vapor canopy that surrounded the earth. In the late 1990's Dr. Henry M. Morris commissioned atmosphere scientist Dr. Larry Vardiman to explore this idea by creating computer model simulations. These models showed that if enough water to produce a flood existed in a vapor canopy, it would create a heat problem because of the greenhouse effect. The canopy model is still debated among creationists.</p>

Reasons People Reject Christianity

<https://youtu.be/Di6Qaa4DrNI>

There are many examples of things Christians may get caught doing that might cause a person to reject Christianity as a result. Ultimately every person is responsible to God to make that decision for themselves despite the actions of others. If a person finds themselves standing before God someday and they use the excuse that a Christian offended them and that's the reason they rejected Him, how would that fly?

A Lesson from the Addo Elephants

<https://youtu.be/zSU5A-MOCYE>

Many years ago, elephants near the cape of South Africa were hunted to near extinction because the people in the area were having problems with them. In a place called Addo, the elephants retreated to a spot where it was almost impossible for them to be hunted. Eventually an area was set aside as an elephant park and fenced in. They were fed citrus fruit and the elephants would congregate in one area waiting for their daily feeding. But the elephants destroyed the habitat and the practice was ended in 1978. This shows that handouts with good motives sometimes have unintended consequences.

Are all Religions Basically the Same?

<https://youtu.be/-mnxfBkphk>

In the effort to appear "tolerant" many people make the statement that all religions are basically the same. The ten commandments, however, contradict that idea, and that explains why there is pressure to remove them from public display. The first three commandments, "Thou shalt have no other gods before me, thou shalt not make any graven images, and thou shalt not take the Lord God's name in vain" point out the exclusive nature of Christianity. Jesus said I am the way, the truth and the life. No man can come to the Father except by me."

<p>A review of the groundbreaking discoveries in brain disease research using the FONAR upright MRI and an interview with Dr. Raymond Damadian, the inventor. Dr. Damadian has a new book Gifted Mind. In 1969, magnetic resonance imaging machines (MRIs) and similar technologies were just an idea in the visionary mind of a young Raymond Damadian. As a boy, he watched his grandmother die painfully from breast cancer, which would eventually play a role in his pursuit of a career in medical research and pioneering this amazing field.</p> <p>Although in 1971 his concept of detecting tumors through MRIs was widely met with mocking skepticism, withing six years he became the first researcher to do a scan of a human, creating technology to reveal cancer within the human body. His life has been an incredible journey of discovery that will help you learn:</p> <ul style="list-style-type: none"> <li>* How his concept for cancer detection was inspired and developed</li> <li>* Why faith remains an integral part of his work</li> <li>* Why he is a strong supporter of the creativity and freedom found in patents.</li> </ul> <p>From resourcefully creating his discoveries on a shoestring budget to a battle with the business behemoth known as GE, learn how the exciting development of this technology led Dr. Damadian to a self-examination of this life and faith. Read this powerful biography and find out what driving force is at the heart of a man who can arguably be called one of the greatest minds in the past 50 years, and how his faith played a crucial role in his work!</p>

This is an age-old question. War is an evil that has always been part of this world, and the question of how a Christian should deal with it has always been difficult. "Apparently I must shoot you," declared Blaise Pascal in Pensees. "You live on the other side of the river, and my leader has a quarrel with your leader. Sorry, I must shoot you." This seems senseless, and in perspective of heaven and hell, and God's ultimate purpose, there is a paradox that a believer must resolve if he is compelled to go to war.

Why are people who are otherwise very intelligent attracted to false worldviews and hold onto them? Using Jason Lisle's book, the Ultimate Proof of God's Creation, we obtain a list of fallacies and discuss why people fall into their trap.

Bioluminescence		
<a href="https://youtu.be/iTv07--PNFM">https://youtu.be/iTv07--PNFM</a>		
A wide variety of unrelated species are able to emit light, and their ability to do so not only requires intelligent design but for dozens of different purposes. To imagine that this functionality arose independently in various species by evolutionary chance is incredible.

Rock Solid Answers about the Biblical Flood		
<a href="https://youtu.be/apeN4r_XB5Y">https://youtu.be/apeN4r_XB5Y</a>		
The book Rock Solid Answers contains common questions raised by evolutionists about the biblical flood. Three of these are addressed in the first few chapters of this book. Did the flood waters rise above Mt. Everest? Would the flood had released poisonous amounts of mercury in the flood waters? Doesn't caves take a long time to form?

Homo Nadelii		
<a href="https://youtu.be/1ZQmt4T51oQ">https://youtu.be/1ZQmt4T51oQ</a>		
It is September, in time for school to start, and time for National Geographic to reveal yet another exciting ape-man fossil. This one is named Homo nadelii and its discovery in a cave in South Africa is triggering a lot of new scientific research and speculation. The Creation Research Society is mounting a challenge to have it examined for soft tissue and to have it C-14 dated. That would establish it as young.

H. G. Wells was raised in the church, but under the tutor of Thomas Huxley and after reading Darwin, he abandoned Christianity, became an atheist and evolutionist. His influence caused many to fall away. Science Fiction also has an impact that needs to be considered.

Untangling the Models of Origins		
<a href="http://youtu.be/G9bFYOeRlrw">http://youtu.be/G9bFYOeRlrw</a>		
From Atheistic Evolution to Biblical Young-Earth Creation there are a variety of origin models that have been proposed, and even within young-earth creation there are differences of opinions. Dr. Jerry Bergman has written an article describing the differences between these models helping us sort out which one is best.

Dr. Jerry Bergman's book The Darwin Effect links the racist attitudes that existed in the world and show how Darwin's theory validated them. The story of the elimination of the Tasmanian race reveals surprising links between the ideas of evolution and how it was used to justify genocide.

Carbon-14 Dating Fossils		
<a href="https://youtu.be/ZbiRQbdfug">https://youtu.be/ZbiRQbdfug</a>		
Evolutionists do not use the Carbon-14 dating method on dinosaur fossils because they believe that dinosaurs are too old to contain Carbon-14. Creation scientists Brian Thomas and Vance Nelson dated sixteen samples of fossils that are supposed to be millions of years old to see if they contain Carbon-14. All sixteen samples showed significant quantities of C-14.

Dinosaur Peptide Preservation and Degradation		
<a href="https://youtu.be/budsAGMokSg">https://youtu.be/budsAGMokSg</a>		
Is it possible for intact peptides, DNA, collagen and osteocytes to be preserved for 68 million years? The iDINO project investigates the fragile nature of biological material and eliminates the possibility that these materials could be preserved for deep time. The discovery of these materials in dinosaur bone indicates that these creatures could not have died out millions of years ago. Dinosaurs are young!

The Copernicus Affair		
<a href="http://youtu.be/4nlAGlfAi50">http://youtu.be/4nlAGlfAi50</a>

Why did God allow thorns and thistles? Why is it that the plants that offer the clearest proof of design are also ones that are either weeds or their designs almost seem pernicious? The answer is surprising. God built these designs as part of the overall coding, knowing that there would be a fall.

<a href="https://youtu.be/WTelpYMzdf0">https://youtu.be/WTelpYMzdf0</a>		
An old 1955 Looney Tunes cartoon featured Michigan J Frog, the annoying frog found in the cornerstone of a building who would put on a top hat and sing for his discoverer, but would not sing for anyone else. The cartoon has become for us a symbol of what it takes to stretch the credibility of a paradigm beyond its breaking point, and for that reason it appears ridiculous. We point out how evolution is like that, and that we are asked to believe a paradigm that is far beyond the limits of credibility.

The Bible's Perspective on Sex		
<a href="http://www.godtube.com/watch/?v=021J0MNU">http://www.godtube.com/watch/?v=021J0MNU</a>		
There is an attempt by those who hold a postmodern worldview to push the boundaries of what is acceptable sexual behavior. If a biblical creationist foundation is rejected in favor of evolution, then the only standards for sexual behavior are limited by what a person thinks is right or wrong. The inconsistency of this position is exposed and the Bible standard is explained.

Summit Summary		
<a href="#">1</a>		
The Origin Summit at MSU was a conference that took place November 1, 2014, featuring four well-known creation scientists from various disciplines: Dr. Don DeYoung from Grace University in Winona Lake Indiana, Dr. Jerry Bergman, Dr. Charles Jackson and Dr. John Sanford.

Lenski's e-Coli Experiment		
<a href="http://youtu.be/vHx8mVoSnCE">http://youtu.be/vHx8mVoSnCE</a>		
Dr. John Sanford is the author of the book Genetic Entropy, and at the MSU Origin Summit, he evaluates Lenski's continuous experiment breeding e-Coli bacteria. Though he applauds the significance of the experiment, Dr. Sanford concludes that the results do not give any support to the theory of evolution.

<a href="https://www.youtube.com/watch?v=5VejCwy1pql">https://www.youtube.com/watch?v=5VejCwy1pql</a>		
Dr. Charles McCombs describes the attempt by scientists to explain the origin of homochirality in life by proposing that left-handed amino acids were formed in outer space on meteorites, and were purified by circular polarized light. He show how this is impossible chemically and evolutionists still cannot explain it.

Jon Iversen is a pilot who works with Wings of Mercy, and he describes the physical principles that need to take place for flight to occur. Applying it to the origin of flight in birds, bats, insects and flying reptiles, one must conclude that flight evolution had to have occurred at least four different times in order for these creatures to evolve. This is just simply incredible and preposterous.

Arizona National Monuments		
<a href="http://www.godtube.com/watch/?v=OM9EBFNU">http://www.godtube.com/watch/?v=OM9EBFNU</a>		
Flagstaff is home to a number of National Monuments that have significance to the creation-evolution debate. Doug and Rich visited Walnut Canyon, Montezuma Well, Montezuma Castle and several other areas of interest in Arizona. The geology of the Coconino sandstone at Walnut Canyon illustrates rapid deposition in a crossbedded fashion. Endemic species in Montezuma Well illustrates adaptation, a concept not opposed by creationists, and actually is an argument for design.

Excuses at the Great White Throne		
<a href="http://www.godtube.com/watch/?v=W6DZGLNX">http://www.godtube.com/watch/?v=W6DZGLNX</a>		
"Great White Throne practice" is how we view arguments for evolution. Everyone must face the end of life, and either we are dead forever, annihilated, or we must face our maker at the Great White Throne. What excuse might one give as he gives an account of his life?

The Search for Noah's Ark and Rules of Logic		
<a href="http://youtu.be/VmWIHig_z4E">http://youtu.be/VmWIHig_z4E</a>		
The Search for Noah's Ark has been a controversy for over 150 years, with many different reports of sightings on Mount Ararat. Now there are many creationists who think that further search is pointless. Applying the rules of logic, we can determine if it is still worthwhile to continue the search.

Postmodern Art & Evolution Worldview		
<a href="http://www.godtube.com/watch/?v=W6DZY7NX">http://www.godtube.com/watch/?v=W6DZY7NX</a>		
Postmodernism is a worldview that reflects the meaninglessness that comes about from a society that has embraced the idea that there is no God and the world came about as the result of evolution. Exhibits at the Eli Broad Museum at MSU demonstrate the effect of postmodernism on modern art and architecture.

Weapons of Mass Distraction		
<a href="http://www.godtube.com/watch/?v=WGPKKLNx">http://www.godtube.com/watch/?v=WGPKKLNx</a>		
Dan Janzen on a recent mission trip to Colombia encountered a number of hindrances concerning his mission to establish sound agricultural practices amongst the native Americans there. These hindrances come from unreasonable application of environmental and organic ideologies that discourage the use of pesticides and herbicides. Dan talks about how the church has gotten involved with this and what the economic impact has been as a result.

The Dark Side of the IQ Test		
<a href="http://www.godtube.com/watch/?v=0EE90MNU">http://www.godtube.com/watch/?v=0EE90MNU</a>		
Early attempts to measure intelligence through testing began with Francis Galton, cousin of Charles Darwin. His experiments were considered a failure, but it led to other psychological tests that have been administered typically to 12-year old students. These IQ tests have had a spotty history and in their worst case use led to eugenics, and in normal use limited opportunities for students to receive advanced training. Doug and Rich explain the Christian view of this and propose an alternative based upon scripture.

The Evolution of Eating		
<a href="http://www.godtube.com/watch/?v=0EF9BCNU">http://www.godtube.com/watch/?v=0EF9BCNU</a>		
<p>When the first form of life evolved, what did it eat? That is the dilemma of origin of life experiments. Even if the first life evolved by chance, if there was nothing for it to eat, it would starve to death. Doug demonstrates the peanut experiment that was used in the Good Science program.</p>

Why Doesn't the Church Provide Answers?		
<a href="http://www.godtube.com/watch/?v=WG7GK7NX">http://www.godtube.com/watch/?v=WG7GK7NX</a>		
<p>Articles by Salvador Cordoba and Mark Amunrud on the RAE web site talk about the experience that many Christians have who pursue a science education and the frustration they experience seeking answers to conflicts between their faith in God and what they are being taught in school and in the church. The lament is that the church is failing its job when it comes to providing solid answers.</p>

Children of Rape		
<a href="http://www.godtube.com/watch/?v=WYGDZLNx">http://www.godtube.com/watch/?v=WYGDZLNx</a>		
A group of people testified before the legislature declaring that they, as children conceived during the act of rape, have as much of a right to live as anyone else. It brings up the moral question of whether abortion should be allowed in case of rape, and if a person is against abortion that they should be forced to subsidize insurance coverage.

Our immune system is wonderfully created by God to maintain our well being and keep us from getting sick. The design of the immune system is discussed and how it indicates the deep love of God. But we speculate that auto-immune diseases may be the result of spiritual oppression such as self-hatred, bitterness, unforgiveness, rejection and accusation.

Psycho-Ceramics: Crackpots		
<a href="http://youtu.be/XA3Hc0RcyUs">http://youtu.be/XA3Hc0RcyUs</a>		
Psycho-ceramics was a term used for those who engage in crackpottery, where invalid arguments are used to support a valid thesis, and valid arguments are used to support an invalid thesis. Several examples of each are discussed, and the origin of the story that Joshua's long day was discovered by NASA in a computer simulation is given as an example.

Paley's Watchmaker argument is discussed, and although some might say that since we know that a watch is assembled by a watchmaker, that we don't have a valid reference. God's artistry in nature is revealed by what it takes to design it.

<a href="http://www.godtube.com/watch/?v=WYLDGPNX">http://www.godtube.com/watch/?v=WYLDGPNX</a>		
It appears to be silly season for evolutionists with a whole series of unusual claims, one of which that life could have come about by chance on comets. An experiment where dry ice was bombarded by BBs in a methane, ammonia and hydrogen gas atmosphere produced the simple amino acids glycine and alanine. Neither of these carry information content, and it is far from being proof of chemical evolution. Another claim that extraterrestrial life was found on a weather balloon is discussed.

Job's Comforters		
<a href="http://youtu.be/FFynZCjLWMM">http://youtu.be/FFynZCjLWMM</a>		
The book of Job is probably the oldest book in the Bible and in the beginning it gives a glimpse of what occurred behind the scenes in heaven. Job's test by Satan was severe and typical of his dark kingdom. But though he lost the battle, a more subtle attack took place when Job's friends came to comfort him. They started out mourning his fate, then gently probing him, and as they speculated about the cause of his trouble, their criticisms became full-frontal attacks. The example Job demonstrated in keeping his integrity needs to be considered by all of us.

Evolution Ministry List		
<a href="http://www.godtube.com/watch/?v=009JJ1NU">http://www.godtube.com/watch/?v=009JJ1NU</a>		
Evolution is a principality with a whole host of harmful subservient entities, much like bitterness, fear, accusation, envy, and jealousy. Romans chapter 1 starts with people who are ashamed of the gospel of Christ, and are unthankful, knowing there is a creator but fully reject Him. This produces a whole host of bad fruit, detailed in the rest of the chapter.

God-of-the-Gaps		
<a href="http://www.godtube.com/watch/?v=009JJFNU">http://www.godtube.com/watch/?v=009JJFNU</a>		
The God-of-the-Gaps argument is a red herring ruse designed to distract from the real issue of design. It basically accuses creationists of appealing to God as an explanation when science cannot explain something, and when science makes a discovery our God gets smaller. In the article Naturalism and Providence, it shows how this argument disappears knowing that the presuppositions of science rest upon theology, and that atheists have co-opted science to try to discredit theism.

Uncle Tom's Cabin		
<a href="http://www.godtube.com/watch/?v=WKPYZLNX">http://www.godtube.com/watch/?v=WKPYZLNX</a>		
Uncle Tom's Cabin was the first American novel to sell a million copies, and its influence upon American culture was very significant, creating the atmosphere where the American slave trade was overthrown in the Civil War. An unashamed Evangelical Christian perspective is portrayed throughout the novel, and it deals specifically with unsound doctrine and Christian compromise that allowed the slave trade to exist.

Walking out of Trauma		
<a href="http://www.godtube.com/watch/?v=OF0F0FNU">http://www.godtube.com/watch/?v=OF0F0FNU</a>		
One of the benefits of being a creationist is the opportunity to apply Biblical principles to health and reap the transforming benefit. Henry Wright's book "A More Excellent Way to be in Health" is an example of a creationist prediction. Traumatic experiences can be healed through the knowledge that God can reverse their effect through forgiveness. This book describes the "walk out" process that can gain freedom from trauma using Biblical principles.

Conquering Bitterness		
<a href="http://www.godtube.com/watch/?v=WKKWZGPNX">http://www.godtube.com/watch/?v=WKKWZGPNX</a>		
One of the benefits of a creationist Christian worldview is the opportunity to apply the principles of the Bible to common problems. The roots of bitterness are explored in a book by Henry Wright, entitled A More Excellent Way to Be in Health. Bitterness causes physical problems identified by the medical field, and there is a Christian biblical procedure we can use to get rid of it.

A More Excellent Way to Be in Health		
<a href="http://youtu.be/HbbkG8_NvCI">http://youtu.be/HbbkG8_NvCI</a>		
An interview with Pete Stoughton, who teaches a twelve-week class based on the book by Henry W. Wright: A More Excellent Way to Be in Health. Pete reflects on the reasons why people go for prayer for healing in the church but do not receive it, and for the most part it is because the root cause of illness is not dealt with. Fear, unforgiveness, bitterness, rejection, trauma, envy, jealousy and occult are spirits that must be recognized, repented of, renounced, resisted, removed.

Myth-Busting: The Importance of Teaching Creation Principles		
<a href="http://www.godtube.com/watch/?v=WKK6WGNX">http://www.godtube.com/watch/?v=WKK6WGNX</a>		
Two articles, one from Creation Ministries International and the other from Creation Matters, point out the importance of teaching the principles of creation and what effect it has on the power of the gospel if it is left out. The Creation Matters article was one by Dr. John Klotz published in 1964 in the first Creation Research Society Annual publication.

Beating a Dead Horse		
<a href="http://www.godtube.com/watch/?v=WKKDGWNX">http://www.godtube.com/watch/?v=WKKDGWNX</a>		
Jerry Bergman's article in Creation Matters about the horse series icon of evolution shows that though the whole concept was debunked by George Gaylord Simpson in 1951, it still was used for decades as proof of evolution. This common argument was in the original Revolution Against Evolution book, and like the other arguments in that chapter, it is a dead horse not worth beating.

Nothing Works Unless Everything Works		
<a href="http://www.godtube.com/watch/?v=09MCJMNU">http://www.godtube.com/watch/?v=09MCJMNU</a>		
Many creatures do not fit the evolutionary stereotype and defy the idea of descent from simpler organisms. Dr. Jerry Bergman's article Whale of a Tale shows the example of dolphins, whales and cetaceans, and the problems with their supposed evolutionary ancestry. Other creatures such as the giraffe, platypus and elephant are also examples. Nothing works unless everything works is the creationist evidence against gradual evolutionary development.

Evolution in Movies and Media		
<a href="http://www.godtube.com/watch/?v=09EB0JNU">http://www.godtube.com/watch/?v=09EB0JNU</a>		
Evolution, because you can make up practically anything you want, is a prime subject for movies. Some examples of the worst movies depicting evolutionary and anti-Christian themes are discussed.

The Dark Side of Charles Darwin		
<a href="http://youtu.be/Zbx2BxEzIZ4">http://youtu.be/Zbx2BxEzIZ4</a>		
Jerry Bergman's book "The Dark Side of Charles Darwin" is a biography of the man who in his own words "murdered God." Darwin's psychotic behavior and illnesses indicate that this man was very troubled by his own mental state, and for that reason alone, his credibility as an honest scientist can be questioned.

The JEPD Theory		
<a href="http://www.godtube.com/watch/?v=WKWKW7NX">http://www.godtube.com/watch/?v=WKWKW7NX</a>		
The JEPD Theory or Documentary Hypothesis claims that Moses didn't write the Pentateuch, and the authors were 4 separate individuals. This goes against everything we know from archaeology and scripture. The premise was based upon the notion that writing hadn't developed by that time.

Evolution's Effect on Modern Art		
<a href="http://www.godtube.com/watch/?v=09M9MCNU">http://www.godtube.com/watch/?v=09M9MCNU</a>		
Rich gives his perspective as an artist upon the effect that evolutionary ideas and philosophy has had in the modern art world. He observes a progression or devolution of art where it goes from expressing meaning in light of a creator to the nihilistic point of view of atheism.

Folding Proteins		
<a href="http://www.godtube.com/watch/?v=W76KD7NX">http://www.godtube.com/watch/?v=W76KD7NX</a>		
Dr. Royal Truman writes about experiments conducted where proteins are split, put backtogether, and the way they fold is different. Doug and Rich discusses why this complicates the evolutionary origin of life.

What Happened During the Days of Peleg?		
<a href="http://www.godtube.com/watch/?v=09M2C1NU">http://www.godtube.com/watch/?v=09M2C1NU</a>		
There has been a running debate between creation geologists as to whether anything of geologic significance happened during the days of Peleg in Genesis where it says that "in his days the earth was divided." The debate is whether the continents split apart during that time or whether it was the division of languages.

Please Sigh: A Story about Point Mutations		
<a href="http://www.godtube.com/watch/?v=W76ZL7NX">http://www.godtube.com/watch/?v=W76ZL7NX</a>		
A note from a teacher said: Progress reports will be coming out this Friday. Please sigh, and return by next Monday. This shows the difference in meaning a point mutation can make in a DNA molecule. Changing one nucleotide can change the meaning drastically. This poses a huge problem for evolution.

Harold Hill's Joshua's Missing Day Explanation		
<a href="http://www.godtube.com/watch/?v=WK7GLGNX">http://www.godtube.com/watch/?v=WK7GLGNX</a>		
In Harold Hill's book "How to Live Like a King's Kid" there is an account of a NASA computer program that calculated the rotation of the earth that supposedly found the missing day of Joshua's time in the Bible and the 40 minutes of Hezekiah's time. Doug and Rich discuss the possibility of this being programmed, and that it is best not to use this story.

Life in Outer Space?		
<a href="http://www.godtube.com/watch/?v=0F0021NU">http://www.godtube.com/watch/?v=0F0021NU</a>		
There have been a number of rehashed arguments, such as the Martian meteorite found in Antarctica, that gives the impression that life may have evolved in outer space. We discuss these various arguments and ask the question, "If we can detect intelligent life in outer space, can we use the same criteria to determine if life on earth is intelligently designed?"

The Wilberforce-Huxley Debate		
<a href="http://www.godtube.com/watch/?v=WKYYZLNX">http://www.godtube.com/watch/?v=WKYYZLNX</a>		
Samuel Wilberforce was bishop of Oxford, and at a meeting of scientists, debated the theory of evolution with Thomas Huxley. The popular account of this debate has Wilberforce portrayed as an obscurantist who promotes theology over science. But other accounts vary and do not show that Wilberforce actually lost the debate.

Three Skulls		
<a href="http://youtu.be/Gaf-xikGYHg">http://youtu.be/Gaf-xikGYHg</a>		
Rich Geer constructed three skulls for the Creation Evidence Museum: Cro-Magnon, Neandertal and Australopithecene. These icons of evolution, when put in their proper perspective, are powerful evidence for early post-flood man, not "cave-men" or "ape-men."

Evolutionists Debunk Their Own Fossils		
<a href="http://www.godtube.com/watch/?v=WK6KLGNX">http://www.godtube.com/watch/?v=WK6KLGNX</a>		
Lucy, Ida, Ardi and Archaeopteryx are all now debunked by their evolutionist proponents. Doug and Rich's work is easy today.

The Universe in Near-Real Time (with Q&A)		
<a href="http://youtu.be/YSfZ8vIwjGw">http://youtu.be/YSfZ8vIwjGw</a>		
Steve Miller presents the idea that we are observing the universe in near-real time, and that there is very little look-back time from the present to the creation of the universe.

Strange Fire in the Earth		
<a href="http://www.godtube.com/watch/?v=WGK677NX">http://www.godtube.com/watch/?v=WGK677NX</a>		
"Strange Fire in the Earth" is the title of an article Dr. von Fange wrote in 1975 for the Creation Research Society Quarterly. He documents evidence from ancient history of fiery judgments upon peoples of the earth as recorded in the Bible.

The Delk Track and Other Famous Creation Artifacts		
<a href="http://www.godtube.com/watch/?v=WK6DGLNX">http://www.godtube.com/watch/?v=WK6DGLNX</a>		
The Delk track was found near the Paluxy River after a flood ripped up a bed of limestone and deposited the rocks on the riverbank. It is a dinosaur track that stepped into a human track. We explored the area where it was found. Carl Baugh also shows us the Meister Print, the Burdick track, the fossilized human finger, the cup in coal and the human handprint, all out of place artifacts and fossils.

The Willett Track and the Adams-Moore Print		
<a href="http://www.godtube.com/watch/?v=0FM1JJNU">http://www.godtube.com/watch/?v=0FM1JJNU</a>		
The Willett human footprint was found on the banks of the Paluxy River in the Dinosaur Valley State Park as part of a series of tracks that still can be seen today. The human stepped into a dimorphedon track, and other dinosaur footprints are found in the immediate vicinity. This is compared to the Adams-Moore print, which was carved, and the differences are unmistakable.

Rhamphorinchoid Pterosaurs in Papua New Guinea		
<a href="http://www.godtube.com/watch/?v=WK6YW7NX">http://www.godtube.com/watch/?v=WK6YW7NX</a>		
Reports of sightings of what the natives in Papua New Guinea call the "Ropen" are discussed. Researchers who authored an article in the CRSQ believe them to be rhamphorichoid pterosaurs.

Emma Darwin: Candle in the Night		
<a href="http://www.godtube.com/watch/?v=OFM10JNU">http://www.godtube.com/watch/?v=OFM10JNU</a>		
Emma Darwin wrote two works, copies of which were loaned to Dr. Carl Baugh for his 25th anniversary of the opening of his creation museum. Her Bible was also on display there at that celebration. Emma's spiritual life was evidence from her testimony in these books, and the struggle she had with her husband who did not share her faith, is revealed in these writings.

A Tale of a Snail		
<a href="http://youtu.be/BIDSACQ8uPc">http://youtu.be/BIDSACQ8uPc</a>		
Doug Sharp talks about the left-handed amino acid dilemma, which gives the odds of producing a viable protein with all left-handed amino acids as one chance in 10 to the 123 power. He sets up a comparison between an experiment cranking out combinations of proteins at 400 tons per second to a snail whose job is to move the entire earth to the known edge of the universe and back at a rate of one millimeter in a million years one molecule at a time. The snail wins the race.

Forensic Science		
<a href="http://www.godtube.com/watch/?v=WG7DGPNX">http://www.godtube.com/watch/?v=WG7DGPNX</a>		
Doug and Rich visits Tombstone, Arizona and the Superstition Mountains. This causes them to reflect on the difference between Forensic Science, which determines historical events based upon evidence found in the present, and Empirical Science, which is observable, testable, and repeatable.

The Soft-Gap Theory		
<a href="http://www.godtube.com/watch/?v=WG7WWGNX">http://www.godtube.com/watch/?v=WG7WWGNX</a>		
The "Soft-Gap" theory attempts to explain the problem of distant starlight and the speed of light by promoting the belief that the universe is old and timeless, but the creation of the solar system is recent, within 6,000 years.

<a href="http://www.godtube.com/watch/?v=010B91NU">http://www.godtube.com/watch/?v=010B91NU</a>		
John Woodmorappe explains his book, Noah's Ark: A Feasibility Study. This work explains every question you could possibly have about Noah's Ark and how it worked. Was there enough room for all the animals? How did Noah and his family feed them, water them, and remove the waste? How was the ark ventilated?
